

Ph.D. Arazoe TAKAYUKI

Junior Associate Professor at
Department of Applied Biological
Science

Tokyo University of Science

A composite background image for the title section. On the left, there are green grass-like plants. In the center, there are blue and purple branching structures, possibly representing a fungal network, with a scale bar indicating 20 μm. On the right, there are green, glowing, circular structures, possibly representing cells or spores.

***Functional analysis of fungal genome
using genome editing***
